

Amendments to the Claims:

1. (currently amended) A cordless medical apparatus suitable for use in orthopedic medical applications comprising a disposable sterile housing having a sleeve, said sleeve being configured to receive an unsterilized motor assembly, wherein said sterile housing is fluid tight.
2. (original) The medical apparatus of claim 1 further comprising a drive shaft engaged with said motor, and at least one bushing communicating with said drive shaft.
3. (original) The medical apparatus of claim 2 wherein said drive shaft is configured as a tool.
4. (currently amended) The medical apparatus of claim 1 wherein the medical device is packaged in a sterile enclosure.
5. cancelled
6. cancelled
7. (original) The apparatus of claim 1 wherein the medical device is a drill.
8. (amended) A cordless medical apparatus suitable for use in orthopedic medical applications comprising a handle sub-component, said handle sub-component being configured to receive one or more batteries; a collet sub-assembly configured to engage a portion of the handle sub-assembly; and a motor sub- component configured to engage a portion of the handle sub-assembly; wherein one or more of the sub-components are fluid tight.
9. cancelled
10. (original) The medical device of claim 8 wherein one or more of the sub-components are disposable.
11. cancelled
12. (new) The medical apparatus of claim 8 further comprising a drive shaft engaged with said motor, and at least one bushing communicating with said drive shaft.
13. (new) The medical apparatus of claim 12 wherein said drive shaft is configured as a tool.
14. (new) The medical apparatus of claim 8 wherein the medical device is packaged in a sterile enclosure.
15. (new) The apparatus of claim 8 wherein the medical device is a drill.
